**Prodotto: Line NITTRA®, belts for porcelain stoneware**

### Caratteristiche:

Thanks to the over 30-year experience on this market, and to the recently patented mark, A Zeta Gomma is proud to introduce the new line Nittra® for all those searching for a technological and top-quality product. All belts Nittra® for porcelain stoneware have been especially developed to solve any operation problem, both for marble and porcelain stoneware. For instance, the special semi-circle (NP) and undersized honeycomb (WT) coating structure, together with the used compound, allow the perfect adhesion in all working situations. Alongside with all this, the polyester fabrics also guarantee high resistance and no noise, thus proving to be extremely versatile.

Moreover, all Nittra® belts, especially studied and developed by A Zeta Gomma for porcelain stoneware, are featured by a gliding surface impregnated with PVC.
