tailor made for you

Green rubber coating with high heat resistance (operating temperature up to 130°C).

Black PU belt high abrasion resistance.

Patented grooves that retain talc, reducing wear, promoting cooling and prolonging the service life of the belt.

The M.E.C.® FLEX 360 belt is a Made in Italy product, internally produced in the A-Zeta Gomma Sassuolo facilities.

It is designed for application in dry squaring machines.

Thanks to its great resistance and durability, it helps reduce maintenance costs and machine downtime.
